

MVP

From the analysis results I should be able to determine the affected stations, then prioritize the redesign by the five most affected stations, and decide when is the best time to proceed with constructions without increase the traffic congestion.

Top 5 Stations by Total Entries (July 2021)

The figure shows the stations that will be hard to remodel without increase the traffic congestion more than it is.

In further study will find a suitable time of the year to remodel it's gates
